FOR IMMEDIATE RELEASE

C-SYSTEMS RELEASES CODIS-ACCESS INTERFACE

The CODIS interface will streamline the dealer's process of ordering from distributors.

ARLINGTON, Texas (April 20, 2010) –We at c-Systems Software, Inc., are set to release the new Codis-Access Interface, which will allow our customers to order parts directly from central distributors through their business management system.

The interface will streamline the process of ordering from distributors and manufacturers as well as reduce common keying mistakes. Users will be able to perform stock inquiries, check orders and more from within their business system.

“CODIS is the real deal and it's going to grow,” Enterprise product development manager Mark Matthews said. “It's going to be big.”

Nearly 100 of our dealers had access to the CODIS interface since the beginning of April during a brief pre-release period. The rest of our customers will have access after our general release at the end of April.

Distributors interfacing with CODIS include: AES Lawnparts; Atlantic Power Inc.; Central Power Systems; Dixie Sales Co.; Engine Warehouse, Inc.; Engines Southwest, Gardner, Magneto Power, Medart Engine/Marine, MWE, PES, Power Source Canada, Preferred Power, RBI and SEDCO.

c-Systems Software, Inc., is a leading provider of business management systems, supplying cutting-edge technology for the outdoor power equipment, agricultural and powersports industries since 1983. We offer software, hardware and full-service, turnkey solutions for dealers and distributors in these industries. Our mission is to provide solutions that increase efficiency, deliver more value and enable our customers to become more profitable.
