

Crader / Blue Mountain Stihl Purchase Order Download

c-Systems Enterprise users now have the ability to download purchase orders to Crader and Blue Mountain Stihl.

The transmission programs must be installed on a workstation with internet access and requires the c-Systems interface programs along with Microsoft .NET Framework version 2.0 or higher.

After the programs are in place and the basic vendor file setup is complete, a purchase order is created and placed into on-order status as usual. Select the appropriate supplier (Crader or Blue Mountain) and the system creates the download file and displays the order.

	Part Number	Ordered Qty	WarehouseID
▶	0000 670 0201	1	01
	1110 790 9600	1	01
*			

Click the *Send* button to transmit the order to the supplier.

The system connects via the internet to the supplier's ordering site and sends the order.

A response is received from the supplier showing the transmission results.
