FOR IMMEDIATE RELEASE

**C-SYSTEMS PREPARES FOR PAYMENT CARD INDUSTRY COMPLIANCE UPDATE**  
c-Systems' software keeps customers on the cutting edge of Payment Card Industry compliances.

ARLINGTON, Texas (April 20, 2010) –In preparation for the impending Payment Card Industry Data Security Compliance program updates, c-Systems Software, Inc., has completed the necessary software changes.

X-Charge will soon release its versions 7.1 and Open Integration to meet compliance codes – effective July 1, 2010 – that prohibit the use of third-party applications from processing payments or storing cardholder information. We at c-Systems have already updated our software to allow customers to swipe debit and credit cards under the updated code requirements.

Visa began implementing these mandates in January of 2008 to prevent card information theft. The PCI also mandates that certain software might need to be validated by an assessor.

c-Systems Software, Inc., is a leading provider of business management systems, supplying cutting-edge technology for the outdoor power equipment, agricultural and powersports industries since 1983. We offer software, hardware and full-service, turnkey solutions for dealers and distributors in these industries. Our mission is to provide solutions that increase efficiency, deliver more value and enable our customers to become more profitable.
